Instructions for Adding a new Email Account

Steps

1. Open the **Mail** application
2. Click on **Mail** in the toolbar at the top, then choose **Add Account**

3. Press the **Other Mail Account** from the options

Choose a Mail account provider...

- iCloud
- Exchange
- Google™
- YAHOO!
- Aol.
- Other Mail Account...

? Cancel Continue

4. Click **Continue**.

5. Enter the necessary information and click **“Sign In”**.

- **Name:** The name you want to appear in the “From” field when sending emails.
- **Email Address:** Your complete email address.
- **Password:** Your email password (forgotten passwords cannot be recovered but can be reset via our Ticket System)

Add a Mail Account

To get started, provide the following information:

Full Name:

Email Address:

Password:

Cancel Create

6. If you see a message stating ‘Unable to verify account name or password’, it means Mail hasn’t used your full email address as the Username.

Ensure your **email address** and **password** are entered correctly, and then complete the remaining fields as follows:

- **Username:** Your full email address.
- **Account Type:** Choose either POP or IMAP from the dropdown menu (this guide defaults to IMAP).
- **Incoming Mail Server:** Prefix with “mail” before the domain name (example: mail.my-domain.com)
- **Outgoing Mail Server:** Prefix with “mail” before the domain name (example: mail.my-domain.com)

Email Address:

Username:

Password:

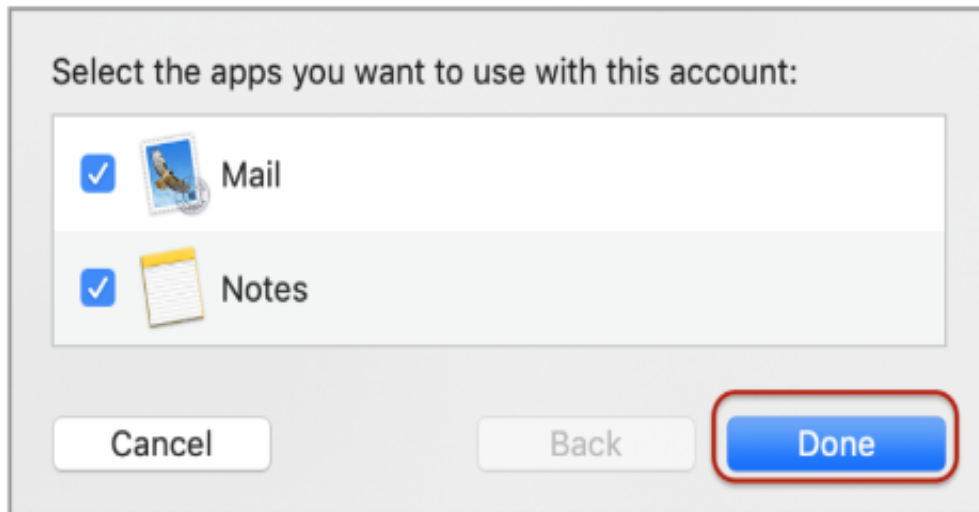

Account Type:

Incoming Mail Server:

Outgoing Mail Server:

Unable to verify account name or password.

7. Click **“Sign In”**. A pop-up will appear asking you to select the apps you want to use with this account. Click **Done** to finish.

*Please note: Occasionally, **mail.domain** (such as mail.example.com) might not function as expected. In such instances, you'll need to utilize the server name instead. (contact us for your server name)

Your **new email account** has been successfully configured. You'll find your new account listed along with any other email accounts.
