

Anchor Highland Stone®

Create a natural stone appearance with easy-to-install options from Anchor Wall Systems. Anchor Highland Stone®, with its rough-hewn exterior and patented rear-lip system, is now available in both six-inch and three-inch heights. Use these units alone or mixed together to create natural stone beauty without sacrificing stability.

Anchor Highland Stone®

The Anchor Highland Stone® retaining wall system combines earthen tones, rich textures, varied contours and all the advantages of the structurally sound rear-lip locating system, making it a reliable and easy-to-install alternative to natural stone walls. The new three-inch-high Highland Stone units provide you with even more design options. Use these units alone or mixed with the six-inch-high blocks to create stunning retaining walls.

A natural-looking wall doesn't have to appear random. Instead of mixing block sizes, limit your project to just one size. This creates a more symmetrical effect.
