

GOLF COURSE APPLICATIONS

▲ RETAINING WALL PAR EXCELLENCE!

- ▶ Classic appearance and proven performance are the right combinations for your golf course landscaping needs.
- ▶ Keystone is economical, easy to install, permanent, and environmentally friendly. Avoid the high maintenance, life cycle and environmental concerns associated with treated landscape timbers or ties.
- ▶ The Perfect solution for course landscaping problems ...elevating tee boxes, gaining usable land area, creating cart paths, solving erosion problems, lining channels or ponds ... while beautifying your course.
- ▶ Available with a variety of architectural textures and color options to compliment any courses appearance.

CLUBHOUSE LANDSCAPING

PONDS, LAKES OR SEAWALLS

► The Keystone Retaining Wall System is the *double eagle* of retaining wall solutions. With Keystone, you can provide permanent and beautiful solutions to your golf courses retaining wall needs.

CARTPATHS & ROADWAYS

TEE BOXES

► Keystone's traditional appearance complements any site including such classics as The Colonial and Spyglass. Golf course superintendents nationwide have found that their own crews can readily install Keystone walls. Best of all, with the permanence and durability of concrete, you won't have to do the job over again a few years later. The flexibility of Keystone permits maximum design creativity as well as the ability to move and relocate this reusable asset as course layouts change over time.

From tee to green ... Keystone has the solution!

► **Keystone** is the proven performer - Millions of square feet are installed worldwide each year in applications ranging from simple planter beds to massive highway projects. When you build with Keystone, you not only get the best product available, you also get the experience and service of the Keystone organization. Technical information is available regarding a wide variety of creative and structural design options.
